

Homework

Introduction To Java

1.

```
// The "Testing" class.
import java.awt.*;

public class Testing
{
    public static void main (String[] args)
    {
        /* output line */
        System.out.println("Testing");

    } // main method
} // Testing class
```

Consider the code above,

- a. What is the name of the class?
- b. What is the name of the source code file?
- c. What is the name of the class file?
- d. Mark the beginning and the end of the class.
- e. Mark the beginning and the end of the main method.
- f. Mark the line of comment.
- g. What is the name of the packages that are imported?
- h. What does the program do?

2. **Output1.java** Write a program that output your name and your address on separate lines.
